

Polycarboxylate Cement

- Designed for strong, dependable performance and long-lasting durability in everyday conditions
- Biocompatible luting cement ideal for cementing crowns and inlays and for use as a cavity liner
- Easy to use, error-free handling makes mixing and placement straightforward and stress-free
- Free from phosphoric acid, helping protect the tooth pulp and reduce irritation
- No acid shock to the tooth surface, improving overall patient comfort during and after treatment
- Sets smoothly without heat and performs reliably, even in moist environments
- Cost-effective and dependable, delivering reliable results without unnecessary expense

Kit:

Contains - 35g Powder, 15ml Liquid, Labels, 1 spoon
