

BencoDental

e•ON[®]

Total Etch LC Bond

- Versatile bonding system – Ethanol-based, fluoride-releasing, 25% nanohybrid-filled, light-cured adhesive compatible with total-etch or self-etch techniques
- Ultra-thin, precise film – Remarkably low ~5-micron film thickness ensures excellent restoration fit with no radiolucent layer; ideal for direct, indirect, CAD/CAM restorations
- High, reliable bond strength – Independent testing confirms exceptional 5-minute and 24-hour bond strengths with low technique sensitivity and minimal variability
- Moisture-tolerant & forgiving – Water/ethanol formulation performs reliably in both over-wet and over-dry environments, reducing technique errors

5ml bottle
