Pit and Fissure Sealant

- Heavily filled, bioactive resin sealant designed to prevent moisture contamination, reducing microleakage and improving long-term retention
- Hydrophilic, wet-bond formulation bonds reliably in moist environments for consistent clinical results
- Releases fluoride, calcium, and phosphate ions to support enamel remineralization, increase hardness, and promote hydroxyapatite formation
- Helps inhibit demineralization and secondary decay at the margins, delivering exceptional marginal stability
- Ultra-thin 20–25 micron film thickness with low solubility (0.06%), BPA- and Bis-GMA-free for added safety

4-1.2ml syringes + 20 tips

[4006-844]-Opaque

[4006-853]-Clear

[4006-862]-A2
