

# Glass Ionomer Luting Cement

- High compressive strength creates strong, durable restorations that stand up to daily wear
- Long-lasting performance designed for reliable results and extended clinical longevity
- Continuous fluoride release helps protect against cavities while supporting tooth health
- Low acidity helps protect the pulp and reduces sensitivity for improved patient comfort
- Requires no pre-treatment, reducing chair time and simplifying the procedure
- Sets quickly and performs well even in moist conditions
- Used for cementing crowns, bridges, inlays, posts, screws and orthodontic bands as well as for cavity lining
- Radiopaque for easy post-operative diagnosis, bonding to enamel, dentine, non-precious metals and porcelain
