Item Number	Pack Size	Description	Additional Description
[5133-035]	100	Disperse	19ga Plastic-hub, bent-metal cannula with padded fiber end can be used with most types of material, including hemostatic agents
[5133-099]	100	Max Disperse	18ga tip is popular for its shape and soft padded brush end. Great for tissue management
[5133-071]	100	Mini Disperse	18ga tip is popular for its shape and soft padded brush end. Controlled flow when only a drop-size quantity is needed.
[5133-115]	100	Spiral Flow	Delivers low to medium viscosity products, smoothly through the internal helical channel and ridge
[5133-053]	100	Curve Bent	Brush tip with adjustable fiber lengths. Can be used with all types of primers, sealants and disinfectants. Approx. 20ga
[3855-821]	100	Nylon Bristle	19ga for use with low viscosity solutions. Curved cannula for optimal entry. Adjustable brush tip fiber length. Allows for controlled delivery. Luer lock hub.
