

BD INJECTABLE FLOW

(High Viscosity)

BD INJECTABLE FLOW Description:

Recommended for all types of restorations, from Class I to Class V, using a single flowable resin, Contourable, Stackable, Equipped with Silane coated Technology (AHC Technology)

Indications:

Characteristics:

- **Compressive Strength:** 448 MPa
- **Flexural Strength:** 137 MPa
- **Two types of Tips:** Bendable (Grey), Non-Bendable (Black)

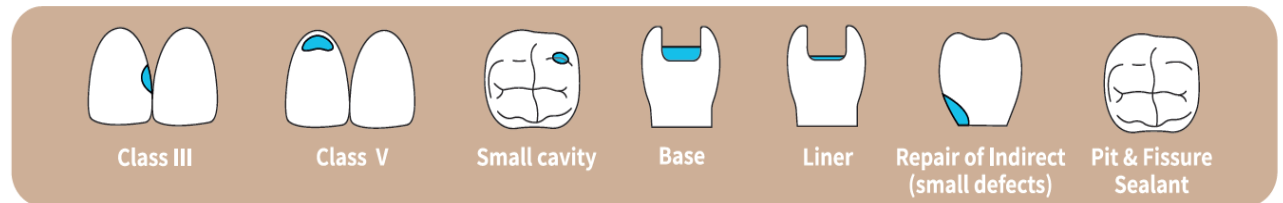

BD FLOW

(Medium Viscosity)

BD FLOW Description:

Recommended use for restorations from Class III & V restorations. Classic flowable resin with easy spreadability.

Indications:

Characteristics for both products:

- **Compressive Strength:** 365 Mpa
- **Flexural Strength:** 114 Mpa
- **One tip only :** Non-Bendable (Black)

BD FLOW LV

(Low Viscosity)

BD FLOW LV Description:

Recommended for use as a Base & Liner. Super flowable consistency for easy spreading and adaptation.
