

A GAME CHANGING APPLICATION FOR DRY SOCKETS*

ORCA™ DRY SOCKET

for dry sockets and oral pain

Non-Medicated • Only Natural Ingredients • Clinically Proven

**Designed and Packaged for Oral Surgery
and Dental Applications**

Highly Effective, Non-Medicated Alternative, Consists only of Essential Oils and other Proprietary Natural Ingredients

Outperforms Other Products Hands Down!

Clinically used in Oral and Maxillofacial Surgery practice for over 16 years with thousands of applications. Over 95% of patients experience complete resolution of dry socket symptoms with one single treatment

Simple and Effective Delivery

Recommended to be applied to socket or extraction site with ORCA Foam™ which will dissolve within a week without the need for removal. Delivery methods may also include an alternative carrier that will dissolve or gauze strip (removal required)

Directions: For adults and children 12 years of age and older. In a sterile fashion, place 8 to 10 drops onto ORCA Foam™, similar resorbable gelatin sponge or gauze strip. Apply directly to dry socket or areas of discomfort in oral region.

FOR PROFESSIONAL USE ONLY

About ORCA Professional

The founder of ORCA Professional is an Oral and Maxillofacial Surgeon with 25+ years of clinical practice experience who clearly understands the needs of doctors in his field of practice to successfully treat patients. He personally uses ORCA products daily and stands behind their quality and integrity. He is always generous in offering his time to provide product knowledge and information to assist sales representatives, distributors and practitioners.

 **ORCA™**
PROFESSIONAL

Innovation. Integrity. Trust.

*The founder of ORCA has had years of referrals from colleagues that have had dry sockets which were refractory to other products and ORCA Professional has always risen to the occasion to resolve discomfort!
