# Soft Tissue Trimmer

- The soft tissue trimmer is an alternative to traditional scalpel and electro-surgery for soft-tissue procedures.
- Features a biocompatible hard oxide tip that cuts tissue without causing burns.
- Applications include gingival modeling, sulcus opening for impressions, cavity access, granulation tissue removal, papillectomies, and exposure of implants and retained teeth.
- Minimizes tissue trauma and reduces bleeding through coagulation with its special porcelain working section.
- Prevents heat build-up, reducing tissue necrosis during procedures.
- Offers high stability for rapid and safe gingival preparation.
- Operates effectively without water or spray cooling, with a usage range of 300,000 to 500,000.

Item Number	Size
[6426-128]	FG Needle Long
[6426-119]	FG Needle Short
