

# 1070 LED Curing Light

- The high-power multi-wave LED curing light, with UV, blue, and white mini-LEDs and an XL diameter lens, is ideal for dentists and orthodontists to cure any composite material
- Built with a durable 12mm head and a single-piece rugged aluminum body
- The only light on the market to combine blue and UV wavelengths for prognosis, and white for diagnostic purposes
- Wavelength range from 385 nm to 490 nm
- Equipped with a wireless charging base, along with a removable, rechargeable battery and a battery charger
- Offers four custom modes: Soft, Standard, Extra Boost, and Ortho for optimal flexibility
- Two-year warranty

**Complete kit includes:** curing light, 1 charging base, 2 silicone protective rings, 20 disposable barrier sleeves, 1 battery, 1 external battery charger, 1 power supply adapter
