

RMGI Cement

- Resin-reinforced for added strength and stability that holds up to everyday use
- Continuous fluoride release helps protect against cavities and supports healthy teeth
- Simple Application with no tooth pre-treatment required, increasing efficiency
- Light-curing control, moisture tolerance and low acidity allows for quick, comfortable placement, supports pulp health and reduces post-treatment sensitivity
- Radiopaque for easy post-operative diagnosis and suitable for cementing crowns, bridges, inlays, and onlays (metal, resin, and ceramic)
- Chemically bonds to enamel, dentine, and the restoration, creating a secure seal at the dentinal margins

Kit:

Contains - 15g Powder, 10ml Liquid, Labels, 1 spoon, 1 mixing block
