

# Endo Access Diamond Burs

- Designed for accuracy and control
- Stainless steel friction grip bur with precision diamond coating to help prevent over-cutting and unintended surface damage
- Rounded tip aligns with standard round bur sizes for easy initial access
- Flared, diamond-coated shaft ideal for enlarging and shaping the pulp chamber
- Solid one-piece carbide construction for increased strength at high speeds and reduced risk of breakage
- Cutting surface: 10 mm
- Total length: 21 mm

Pack of 3
