

Low Viscosity Flowable Composite

- Light-cured radiopaque nano-hybrid
- Combines strength and esthetics, offering enhanced wear resistance, polishability, and durability
- Ensures excellent flow and adaptation to cavity walls, making it ideal for minimally invasive restorations and precise placement
- Suitable for Class III, IV, and V restorations, as well as pit and fissure sealants and small repairs.
- Contains high molecular weighted urethane methacrylate monomer for superior compressive strength

Includes:

- 2-2gram syringes
- 8 dispensing tips
