

BencoDental

e•ON[®]

LC Cavity Liner

- **Pulp Protection & Versatility:** Light-cured radiopaque calcium hydroxide paste indicated for both direct and indirect pulp capping, and as a protective base/liner beneath restorative materials such as composites, amalgams, and cements.
- **Excellent Barrier Properties:** Provides thermal, acid, and etching protection—ideal for deep cavities and use beneath adhesive or etch-and-bond systems.
- **High Strength & Durability:** Highly filled formulation with 80 MPa flexural strength, low solubility in oral fluids, and resistance to acids for long-lasting performance.
- **Radiopaque & Easy to Use:** Single-component, ready-to-use material that cures in 30–40 seconds and offers strong adhesion to composites for a reliable seal.
- **Stable Formulation:** Contains Urethane Dimethacrylate (UDMA), Triethylene Glycol Dimethacrylate, Calcium Hydroxide, radiopacifiers, fillers, curing agents, and stabilizers; shelf life approximately 3 years.

4 x 1.2ml syringes + 20 applicator tips
