

# Flowable Temporary Filling Material

- Versatile temporary indications: useful for temporary fillings, sealing implant screw access and inlays/onlays
- Simple to apply: non-sticky placement in easy-to-use syringe delivery
- Excellent handling: allows for easy sculpting and contouring
- Convenience: 10 to 20 second light-cured material saves chair time
- Low shrinkage: ensures tight marginal seal to reduce microleakage and sensitivity during temporary phase
- Easy to remove in one piece

**1.2mL x 4 syringes**
